

LEECH LAKE

~FIVE MILE POINT~

*Cass County
Gould Township
2003*

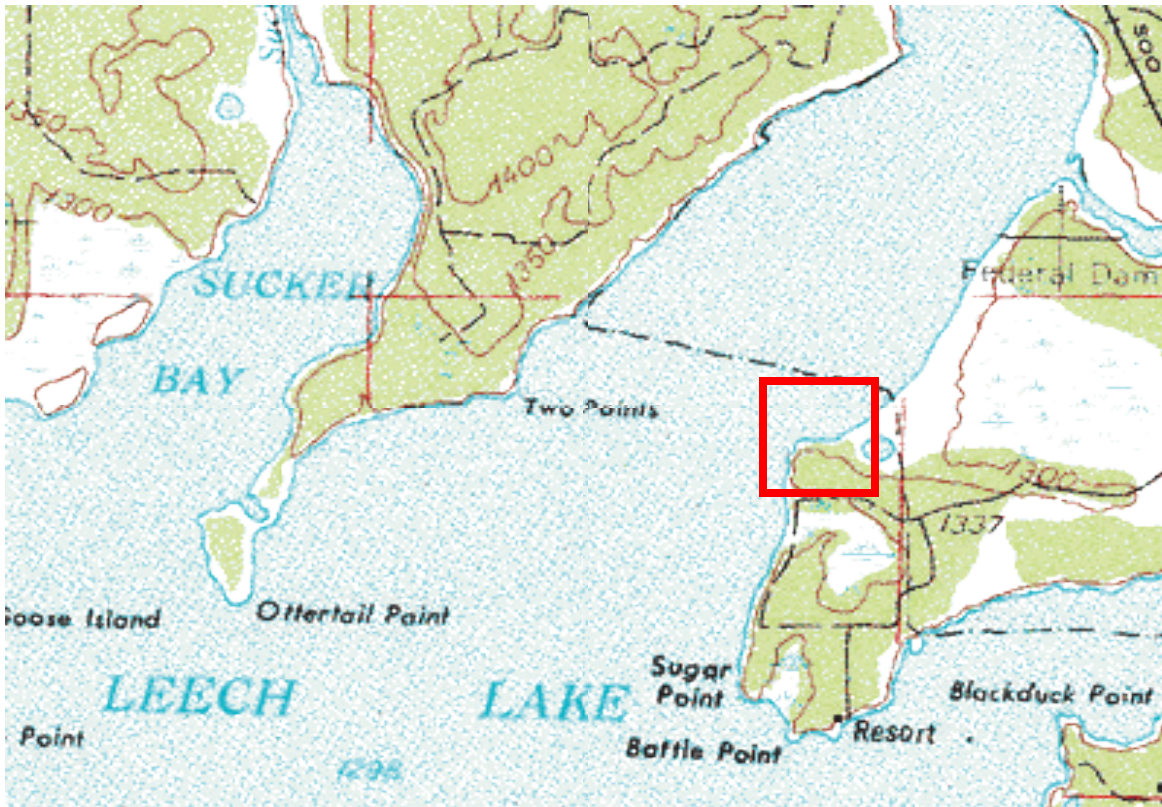

Faced with the threat of a 30 boat harbor project on Five Mile Point adjacent to one of the lakes seven known muskie spawning areas, the Leech Lake Area Watershed Foundation joined forces with Muskies, Inc. and the MN DNR Section of Fisheries to complete a major conservation project on the east shore of Leech Lake in 2003. Muskies, Inc. chapters across the mid-west fund raised over \$24,500 which triggered a match from the Reinvest In Minnesota (RIM) Program. LLAWF contributed over \$150,000 in shore land parcels it owned thereby triggering an additional match from the RIM Program. 1,150 feet of wild shore land and 30+ acres of upland were purchased out of Indian Trust status from a private landowner for permanent protection and is presently managed by the DNR as an Aquatic management Area (AMA)..
